

Send It App

Purpose.

This project plug-in allows Acquire to upload images to a server.

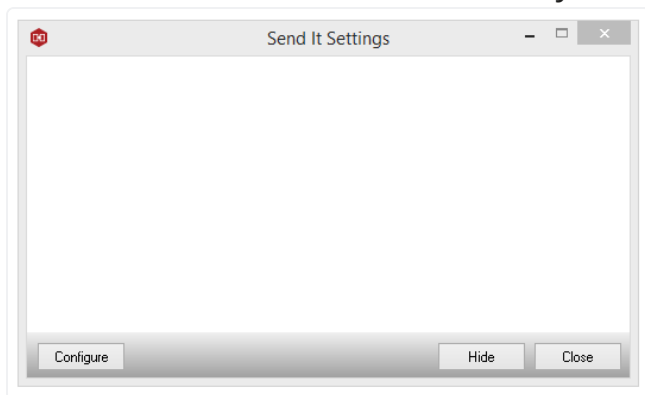

An image folder

is monitored and any new files are uploaded together with a thumbnail.

The thumbnail file name is the original name (e.g. pic1.jpg) with “_tn” appended (e.g. pic1_tn.jpg).

Events window.

This is the first window shown when you configure the plug-in.

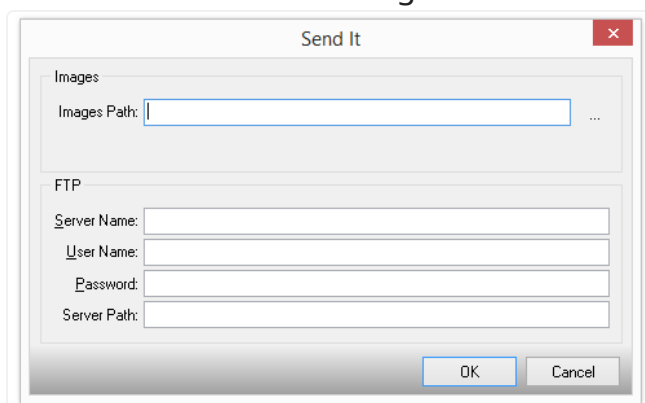

1. **The events pane:** This shows upload progress and status.
2. **Configure:** Press this to open the configuration window proper. *See below.*
3. **Hide:** Press this to hide the window. The plug-in will continue working in the background.
4. **Close:** Press this to close the plug-in.

Configuration Window

This window is shown when you press the **Configure** button in the Events Window.

Press **OK** to save the configuration and return to the Events Window or press **Cancel** to return without saving.

Images (Source)

- **Images Path:** Enter the full folder path of the location of the images to upload. Press the Choose '...' button for a folder selection dialogue box.

FTP (Destination)

- **Enter your server log-on details:** Server name, User name & Password.
- Enter a **folder path** on your server where you want the images and thumbnails to be uploaded.
