

# Web Busy App

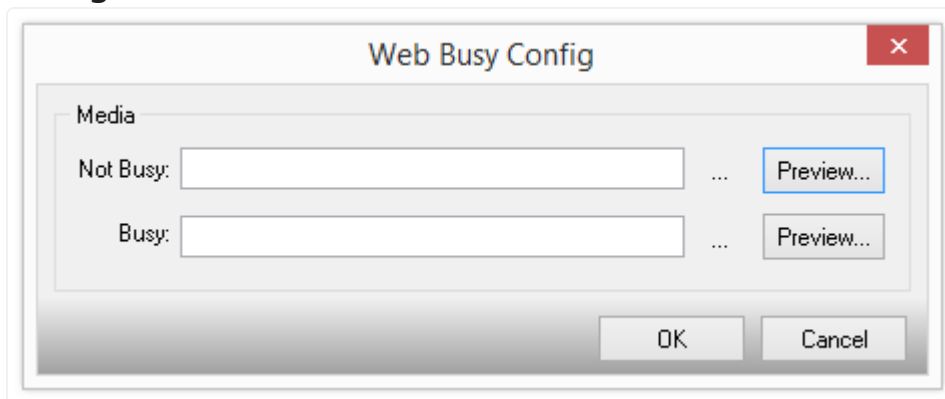

## Purpose.

This page app displays media while a ~~Cyber Browser page app~~ on the same page is busy (loading a web page) or not busy.

**Tip:** Do not use more than one Web Busy app on a page.

## Configuration.

Enter the names of media files, located in the project's media folder, to play while the app is busy (loading a web page) and not busy.

Type in a file name or use the "..." button to select one.

Press the **Preview** button to preview the media.

Press **OK** to save the configuration and close the window.

Press **Cancel** to close the window without saving.
